PROFESSIONAL SUMMARY

Epidemiologist-trained data professional (MS Biostatistics) with 8+ years of experience in public health surveillance, data analysis, and statistical programming. Proficient in SAS, R, SQL, and REDCap for analyzing vital statistics, hospital discharge data, and disease surveillance data. Experienced in data cleaning, validation, and reporting for public health programs. Seeking to apply analytical skills to maternal and child health, infectious disease surveillance, and rural health initiatives.

TECHNICAL SKILLS

- Statistical Programming: SAS, R, SQL, Python
- Data Systems: REDCap (familiar, training completed), EHR/EMR, NEDSS
- Public Health: CDC NNDSS, MMWR reporting, vital statistics, Perinatal Periods of Risk (PPOR)
- Data Visualization: Power BI, Tableau, Excel
- Data Quality: Validation, reconciliation, quality assurance

PROFESSIONAL EXPERIENCE

Revenue Cycle Coordinator | BrightSpring Health, Nashville, TN | Jul 2026 – Present

- Extract, transform, and analyze payment data using Athena and Excel.
- Perform data validation and reconciliation across multiple systems.
- Identify trends and discrepancies in healthcare data.

Revenue Cycle Data Analyst | Traditions Health, Franklin, TN | Jan 2024 – Feb 2026

- Analyzed healthcare data using SQL and Excel, identifying trends and implementing process improvements.
- Conducted data validation audits to ensure accuracy and compliance.
- Performed data reconciliation and quality assurance on patient eligibility rosters.
- Independent Project: Acute Hepatitis Surveillance (TN, 2016) – Analyzed CDC NNDSS hepatitis data using R, applied CDC/CSTE case definitions, and generated weekly outbreak trend visualizations.

Billing Systems Analyst | Dialysis Clinic Inc., Nashville, TN | Jun 2016 – Jan 2024

- Analyzed 500+ monthly healthcare claims using SQL and Excel, identifying systemic denial patterns and implementing data-driven recovery strategies that recaptured $250K+ in annual revenue.

- Developed and maintained a SQL-based tracking system to monitor data integrity, reducing data errors by 25%.
- Extracted and synthesized EHR data to create weekly performance dashboards for management, supporting strategic decision-making.
- Conducted data validation and quality assurance on patient records, ensuring 99.9% accuracy in insurance verification and coding.
- Managed and reconciled large datasets across multiple payer systems (Medicare, Medicaid, Commercial), ensuring data consistency and compliance.

EDUCATION

Middle Tennessee State University | Murfreesboro, TN
Master of Science in Biostatistics | May 2023
Relevant Coursework: Advanced Statistical Modeling, Data Mining, Longitudinal Data Analysis, Clinical Trials

Austin Peay State University | Clarksville, TN
Bachelor of Science in Healthcare Management | May 2016
